Weight: 6.7 kg

PART EXHIBITED IN THE JEC INNOVATION SHOW CASE AREA

Rostselmash Harvester Hood

Molder: Promens (Czech Republic)

OEM: Rostselmash (Russia)

Weight: 160 kg

Telene SAS, a Rimtec Corporation company, develops and distributes Telene®, a two-component DCPD (dicyclopentadiene) resins system, converted by the RIM (Reaction Injection Moulding) process, and resulting in a high performance polymer. Its process and properties allow the formation of large, complex design parts, resistant to hostile environments and cost effective for small to medium series. Telene SAS headquarters, R&D centre and sales office for EMEA are located in Drocourt, France.
