

Triumphant Return to Base Camp for Antarctica2 Tractor after reaching South Pole

We send our warmest congratulations to Manon "Tractor Girl" Ossevoort and her crew on their magnificent achievement !

Hostile Antarctic Environment:

During the trip, conditions were extreme : the crew met bitter cold, punishing "Sastrugi" (solid ice-waves of one meter high), high altitude, solid ice, snowdrifts, thick freezing fog and exceptionally rough land.

The expedition was the ultimate test of strength and durability, exerting a massive strain on the components and really challenging the integrity of its design.

It was an epic trip that mirrored the expedition of Sir Edmund Hillary in 1958. Ferguson tractors were utilized in 1958 and were the first motor vehicles to reach the south Pole

The Antarctica2 tractor expedition was the ultimate challenge

ANTARCTICA 2

Telene[®]

Innovative chemistry for designers

Tractor components

The engine clocked an impressive 760 hours of operation and 4,670km (2,900 mi) across the toughest environment on Earth.

It is equipped with standard Telene pDCPD body panel parts (hood and fenders), manufactured by Polirim in Italy.

Expedition team has reported a flawless performance of our parts throughout the journey.
